NETWORK UPDATES ! 1

STATE OF THE ART SCHEDULING ! 1

PAPERLESS SUPER BILLS AND MORE ! 2

WHAT YOU WILL NEED, AND WHAT MORE IS COMING ! 2

Our First Issue !

NETWORK UPDATES FOR YOUR BENEFIT !

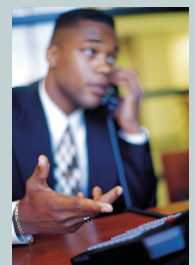

OUR NETWORK IS NOW THE MOST ADVANCED IN THE HIGH DESERT.

In the upcoming months, we will be upgrading our entire network to better serve you in the coming years. Clients who have already made the transition to paperless EMR or EMH office software will easily and securely have access to our database of your patient information. In this issue we will cover some of the advancements you will enjoy as a result of our upgrade. Some enhancements will be hidden, like our Triple Redundant Backups that ensure the safety, security and integrity of all data in our system. Others, such as custom letters to your patients regarding Treatment information, Laboratory results, follow up letters, or possibly any document you can imagine, will transform our database into a powerful tool for your day to day office routines. Some of the most simple matters, such as a copayment receipt, will be customized and printed for your patient at the time of service, and stored forever in our database for future reference. You will also have access to the most recent patient transactions and charges, as well as payment, denials, and a variety of information that will assist you and your staff when questions arise during a visit. Patients may even opt for statements via EMAIL—paperless billing, provided they are willing to sign a special waiver indicating their wish to opt out of regular postal delivery of their monthly bill. The sky has

quickly become the limit to our new system, and of course you and your staff, as well as ours, will reap the benefits of the most advanced Medical Billing Network in the High Desert.

STATE OF THE ART SCHEDULING

Keeping track of your appointments has never been easier. With the power of our database, you will never have to enter another patient in a third party scheduling program. Whether you have one doctor or five, you can maintain multiple appointment books with the latest patient information to assist you in checking eligibility, copayments due, call back numbers, etc. Your schedules are safely kept live, real-time on our server, so you will never need to backup your data. Print them, change them, and add to them, whatever you like....the newest appointment book program is one of our most powerful features, and its all at your fingertips 24 hours a day 7 days a week.

PAPERLESS SUPER BILLS & WHAT YOU WILL NEED

During the course of our upgrades, we will be switching all of our clients to 'paperless super bills'. Your appointment book from our network will automatically create a customized super bill for each patient on your schedule, that will include their name, date of birth, account number, and whatever else we see fit to include. It will also interface with your automatic receipt (if the patient pays a co-pay or makes a payment) and then all that's left is for you or your staff is to electronically indicate what service was rendered, what the diagnosis

is, and any other information you see fit to include on the paperless form. These forms will eliminate confusion between offices over handwriting issues, illegible copayment information, illegible diagnosis, and most important: no paper investment on your part whatsoever. At the end of each day (or whenever you like) you will simply email us a 'batch' of paperless super bills. Thus eliminating paper, storage, and all the rest of the hassles that come with handwritten forms. What will your office need for all of these improvements? High Speed

internet access, of course! Most of our clients already have Verizon DSL or Charter Cable. Dial up is not an option. This 'real-time' link is only possible thru a high speed connection. You will also need at least one computer, running Windows XP-SP2 or Vista. That's it.....A Computer and an internet connection! Very Simple. Very powerful. There will be additional upgrades inside our office that you won't see, ones that make us more efficient, and even more tools for you that have yet to be announced. As more upgrades come online we will announce them in future issues of MBU !
